PROFESSIONAL SUMMARY

Frontend Developer and UI/UX Designer with expertise in building scalable, user-centric web applications using React and modern JavaScript frameworks. Combines technical proficiency with design thinking to deliver intuitive digital experiences. Proven ability to optimize performance, ensure accessibility compliance, and collaborate effectively in agile environments. Currently pursuing advanced studies in Design and Media while maintaining active development projects.

EDUCATION

ICAT College of Design and Media

Post Graduate Program in Design and Media

Bengaluru, Karnataka

August 2025 – August 2026

- Specialized curriculum in UI/UX design, interaction design, and user research methodologies
- Applied design thinking frameworks to solve complex user experience challenges

Mahatma Gandhi Memorial College

Bachelor of Computer Application, GPA: 9.08/10

Udupi, Karnataka

July 2022 – July 2025

- Core coursework: Data Structures, Web Technologies, Database Management Systems, Software Engineering
- Project: Developed a Vehicle Rental Management System with vehicle listing, booking, availability tracking, and user-friendly rental workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL

Frameworks and Libraries: React.js, Node.js, Bootstrap, Tailwind CSS, Express.js

Tools and Platforms: Git, GitHub, Figma, Visual Studio Code, Chrome DevTools, npm

Design Skills: UI/UX Design, Wireframing, Prototyping, User Research, Responsive Design, Accessibility (WCAG 2.1)

Core Competencies: RESTful API Integration, Performance Optimization, Cross-Browser Testing, Agile Methodologies

TECHNICAL PROJECTS

Karyabandhu – Gig Worker & Employer Platform | *React.js, Node.js, Express.js, MongoDB, REST API* 2026

- Developed a full-stack job matching platform connecting gig workers with employers for local employment opportunities.
- Implemented secure role-based authentication with dedicated dashboards for workers and employers.
- Built features including job posting, job applications, profile management, and applicant tracking.
- Integrated REST APIs and designed a responsive interface optimized for desktop and mobile devices.

Netflix Clone | *React.js, CSS, TMDB API, Firebase*

2026

- Built a Netflix-inspired streaming platform using React.js with reusable component architecture.
- Integrated TMDB API to fetch and display trending, popular, and top-rated movies dynamically.
- Implemented movie search, category-wise browsing, and trailer viewing functionality.
- Created a responsive user interface optimized for desktop, tablet, and mobile devices.

BiteMood Food Delivery Website | *React.js, CSS, JavaScript, JSON*

2025

- Developed a responsive food delivery application using React.js with reusable UI components.
- Implemented dynamic menu rendering, shopping cart functionality, and real-time price calculations.
- Managed application state for cart operations and product quantity updates using React Hooks.
- Designed a mobile-friendly interface with category filtering, customer reviews, and responsive layouts.

Movie Streaming Website | *React.js, CSS, JavaScript, JSON*

2025

- Built a movie streaming application using React.js with component-based architecture.
- Implemented movie search, genre filtering, and dynamic content rendering using JSON data.
- Developed interactive movie cards, watchlist functionality, and seamless navigation between pages.
- Created a responsive and modern user interface optimized for desktop, tablet, and mobile devices.
